VISION FOR THE PROGRAM AND HIGHLIGHTS OF THE SCIENTIFIC STRATEGIC (PAPERBACK)

Createspace, United States, 2014. Paperback. Book Condition: New. 279 x 216 mm. Language: English . Brand New Book ***** Print on Demand *****.In May 2001, the Administration asked the National Academy of Sciences - National Research Council (NRC) to provide an updated evaluation of key questions about climate change science. Upon receipt of the NRC's report in June 2001, the President directed the relevant agencies and departments of the federal government to build on the extensive U.S. Global Change Research Program (USGCRP) to accelerate research on the most important uncertainties in climate science, enhance climate observation systems, and improve information available to decisionmakers. To accomplish this, the Administration took several steps: The President launched the Climate Change Research Initiative (CCRI) in June 2001, with an enhanced focus on the climate effects of aerosols (tiny particles) in the atmosphere, the carbon cycle in the Earth system, climate modeling, observations, and development of scientific information to support decisionmaking. The President created a new, cabinet-level organization in February 2002, to improve the government-wide management of climate science and climate-related technology development. Two collaborative interagency programs were launched in response to the President's direction: the Climate Change Science Program (CCSP) and the Climate Change Technology Program. In July 2002, a year-long process to prepare a 10-year strategic plan for the CCSP was initiated. This planning process was designed to ensure a comprehensive examination of research and observation needs, transparent review by all the international scientific and stakeholder communities, and establishment of defined goals for the research. This document, together with the companion CCSP scientific strategic plan, represents the culmination of the planning and public review process. The United States has also launched an international effort to design and implement a comprehensive, multilaterally sponsored Earth...
