Brand New Book ***** Print on Demand *****.Excerpt from *A Discourse on the Studies of the University of Cambridge Again*, the Author tells us (p. That we see nature alike willing to go back and to go forward. Both effects are simply the result of the operation of the law of development in the generative system. No one denies the great modification of specific types from a change of external conditions: but when he appeals to a law of development in the generative system which produces a change of species, either on the ascending or descending scale, we can only state in reply, that we utterly deny the existence of any such law, or of a single fact whereon to build it. So far from being based on a wide induction of facts, (and without such induction the verbal expression of a material law is no better than a mockery), the Author has not advanced so much as one unequivocal instance in support of it. The voice of all nature is against him. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books.
