paperback. Book Condition: New. Ship out in 2 business day, And Fast shipping, Free Tracking number will be provided after the shipment. Pages Number: 436 Publisher: Machinery Industry Pub. Date :2008-06-01 version 1. This book is a study of modern electronic design (EDA) of the material. The book is divided into four parts: the first EWB 9 application infrastructure. including the first - six chapters. focuses on EWB 9 of the basic functions and basic application methods. The second part is an instance of simulation and experiment. is the focus of the book. including the seventh ~ 12 chapters. through a typical circuit simulation. simulation. analysis to introduce EDA technology in electrical principles. circuit analysis. analog electronics. digital electronics and hybrid electronic circuit design applications. and problems with thinking and the corresponding experiments. in order to achieve the purpose of learning and training simultaneously. The third part is introduced Multisim resources including chapters XIII and XIV. is EWB 9 complementary use of resources. the main components of the application described in this section also describes Multisim 9 for 3D presentation capabilities. The fourth part is the PCB layout. introduced Uhiboard 9 of the application methods and design examples. CD with the book provides EWB 9 Demo version and some simulation examples in this book. Book written in simple. verbal fluency. step by step. theory and practice. closely integrated. providing a wealth of application examples. experiments. not only as a undergraduate. vocational electronics specialty materials. also suitable for electronic design engineers and technicians for reference. Contents: Preface Part EWB 9 Chapter EQB 9 based applications the basic application of Section II on EWB 9 Introduction to Multisim 9 interface circuit simulation III IV V established circuit to add text to the circuit sub-VI circuit-level design and multi-page analysis of Section I Chapter...
